Dubai,UAE

As a professional web designer and developer, I am dedicated to using my skills and experience to make a positive impact on clients, coworkers, and the internet. I have a strong passion for creating compelling and attractive websites and enjoy working on projects that involve a mix of web and graphic design, web development, database management, and programming.

I am driven to succeed and constantly seek opportunities to improve my skills and advance my career. I believe that my potential in the field of web development, combined with my innovative and creative skills, can bring value not only to myself but also to the growth of any company that I work for.

I am highly motivated and always looking for new challenges. I am confident that my skills and experience make me an asset to any team and I am excited to continue growing and learning in my career.

North Tours | Dubai | Feb 2017 - Nov 2017

Full Stack Developer

I was hired as a full-stack developer at North Tours and had the opportunity to work with a great team on their B2B online system. I was with the company for a total of 9 months.

Drupak | Peshawar, Pakistan | Feb 2014 - Oct 2016

Full Stack Developer

Drupak is a well-respected member of the Drupal Association in Pakistan and is listed on drupal.org. It was at Drupak that I began my web development journey, completing a 1-year internship before continuing to work there as part of a multi-disciplinary team on various tasks. My main focus was on ensuring that the websites we built for customers exactly met

their requirements, using both Drupal CMS and custom development tools like PHP and JavaScript. Overall, Drupal was a great place for me to gain experience and grow my skills as a web developer.

...

PROJECTS

I have extensive experience working on numerous small and large websites and landing pages, but I am unable to list every single project here. Instead, I would like to highlight a few of my favorite, more recent ones.

Suzuki UAE | 2020 - 2022

As a full stack developer, I have had the opportunity to work on the Suzuki UAE official website, where I was responsible for all aspects of development including the frontend, backend, and database. I utilized a range of technologies including Laravel, Vue.js, and MySQL to create a complete CMS in Laravel and an email management system. This project allowed me to showcase my skills and expertise in full stack development and demonstrate my ability to deliver high-quality results.

Ballers | 2022

Ballers Sports Academy is a sports academy located in Dubai that approached our team with the goal of creating a new website to showcase their programs, facilities, and team of coaches. As the frontend developer

The primary goal of this project was to create a user-friendly and visually appealing website that effectively communicated the services and offerings of Ballers Sports Academy. The website needed to be easy to navigate and provide clear information about the various programs and facilities available at the academy. In addition, the website needed to be responsive and work seamlessly on all devices.

For this project, we used WordPress CMS to manage the content and Vanilla JS to implement the functionality. WordPress allowed us to easily create and update content, while Vanilla JS provided a lightweight and fast solution for the website's interactive elements.

Printo | 2021- 2022

Printo is a large-scale e-commerce platform that allows users to purchase a variety of stationery, books, magazines, catalogues, and directories. One of the unique features of Printo is the ability to create custom designs and packages. I used Vue.js and Laravel to develop the platform. These technologies allowed me to create a seamless and user-friendly e-commerce experience for customers.

Icon Advertising LLC | 2019 - 2022

I developed the Icon Advertising LLC website using Nuxt.js as the frontend framework and Drupal as a headless CMS, which gave me greater flexibility in terms of design and functionality. To manage the API calls, I utilized GraphQL. This combination of technologies allowed me to create a dynamic and efficient website for the company.

Buffelo Energy Drinks | 2022

Buffelo Energy Drinks is a leading brand in the energy drink industry, known for their high-quality products and innovative marketing campaigns. The company approached our team with the goal of creating a new website to showcase their products and promote their brand. As the developer on the project, I was responsible for implementing the design and functionality of the website.

The primary goal of this project was to create a visually appealing and engaging website that effectively communicated the brand message and product offerings of Buffelo Energy Drinks. The website needed to be easy to navigate and provide clear information about the various products available, as well as highlight the unique features and benefits of the brand. In addition, the website needed to be responsive and work seamlessly on all devices.

For this project, we used WordPress as the CMS to manage the content and Vanilla JS for the frontend functionality. In addition, I utilized the GSSP (greensock) Js library to create smooth and eye-catching animations throughout the website.

GoMotorz | 2019

As a full stack developer, I worked on the GoMotorz platform, which is designed for B2B and B2C vehicle sales. For this project, I used Laravel for the backend and Vue.js for the frontend, allowing me to create a seamless and user-friendly experience for users.

Amirr R. | 2021

Amirr R. is my personal website, where I share my own tutorials, code snippets, themes, and templates with my YouTube viewers. It is a progressive web app that is optimized for search engines and built using my favorite framework, Nuxt.js. To manage the content, I used WordPress as a headless CMS, and I utilized GraphQL to handle the API calls. Overall, this combination of technologies allowed me to create a fast and efficient website that is easy to update and maintain.
